Request

Parameter

Header

consultantNumber string **Required** (path)

The consultant number of the requested eAU without leading zeros.

Example:

consultantNumber = 455148

Schema:

```
{"type":"string","description":"The consultant number of the requested eAU without leading zeros."}
```

**clientNumber** string **Required** (path)

The client number of the requested eAU without leading zeros.

Example:

clientNumber = 1

Schema:

```
{"type":"string","description":"The client number of the requested eAU without leading zeros."}
```

Example request

curl ▾

```
1 curl --request GET \  
  --url https://eau.api.datev.de/platform/v1/clients/REPLACE_CONSULTANTNUMBER-REPLACE_CLIENTNUMBER \  
  --header 'Authorization: Bearer REPLACE_BEARER_TOKEN' \  
  --header 'X-Datev-Client-ID: clientId' \  
  --header 'accept: application/json' \  
5
```

Response

200 ▾

Returns that the client has the permission, if the right to use 'Lohnaustauschdatenservice' has been granted for at least one employee.
